

Minhajur Rahman Mahi

Full-Stack Software Engineer | ERP & Web Application Development

mrahman61142@gmail.com | 01715724712 | Mirbag, Modhubag, Dhaka | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

SUMMARY

Full-stack developer with close to two years of experience building ERP systems and web applications on Python, JavaScript/TypeScript. Specializes in ERPNext/Frappe customization, REST API design, and MariaDB-backed systems — from HR and payroll modules. Comfortable owning a feature end-to-end: schema, backend logic, automated workflows.

PROFESSIONAL EXPERIENCE

Junior Software Engineer

05/2025 – Present

Fusion Infotech Limited

- Built a Provident Fund management system in ERPNext covering PF loans, payroll-linked automated deductions, employee-wise PF ledgers, and validation rules.
- Delivered core HR functionality spanning payroll processing, leave policy management, staff loans, and a bulk employee ID card generation tool.
- Extended ERPNext/Frappe modules for Project Management, Buying, Selling, Stock, and Asset tracking to support end-to-end business operations.
- Customized the client support system with ticket management, check-in reporting, and route-based salesman tracking to improve service visibility.
- Designed and implemented automated approval workflows (e.g., sales route-assignment approval) to cut manual back-and-forth in daily operations.

Intern Software Engineer

11/2024 – 02/2025

W3 Engineers Ltd | Dhaka, Bangladesh

- Developed RESTful APIs powering multiple applications.
- Built a Content Management System using Django, Next.js, and PostgreSQL.
- Designed and implemented a Flight Details Management System integrating Elasticsearch, Beego, and Swagger for fast search and clear API documentation and completely dockerized it.
- Dockerized every delivered project to standardize deployment and environment consistency across the team.
- Wrote and executed unit tests to strengthen code reliability and catch regressions early.

PROJECTS

LLM Integrated Medication System (In development) [GitHub](#) — In-development healthcare assistant where users register, save a health profile, and receive Groq diet and exercise plans, with prescription PDFs converted into medicine details. Staff can review those patient records. *(React, TypeScript, Django REST, PostgreSQL, Groq)*

Content Distribution Engine [GitHub](#) — Admins assign articles to writers, then review, comment, and approve. Paired with a Next.js editor. *(Django, Next.js, Docker)*

SmartTution [GitHub](#) [Live](#) — Students and tutors register, browse tutor profiles, and post tuition requests by class, area, and medium. *(React.js, Node.js, Express.js, MongoDB)*

Flight Details System [GitHub](#) — Search flights by parameters or by destination and time, with Elasticsearch, Swagger, Docker, and unit tests. *(Golang, Beego, Elasticsearch, Swagger, Docker)*

Property Management System [GitHub](#) — Accommodation listings with PostGIS locations, property-owner signup, role-based admin, and multilingual descriptions. *(Django, PostgreSQL, PostGIS, Docker)*

Hotel Management API [GitHub](#) — Create, update, and fetch hotels and rooms, with image upload, slug lookup, and Jest tests. Next.js detail pages on the frontend. *(Next.js, Express, TypeScript)*

SKILLS

Languages: Python, JavaScript, TypeScript, Golang, Java

Frontend: React.js, Next.js

Backend: Frappe, Django, Flask, FastAPI, Node.js, Express.js, Beego

Databases: PostgreSQL, MariaDB, MongoDB, Microsoft SQL Server

Tools & Other: Docker, Git/GitHub/GitLab, Elastic Search, Kibana, Postman, Selenium, QGIS

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering

2020 – 2024

Ahsanullah University of Science and Technology | CGPA: 3.17
